

M03: Final Project Website – Topic Selection and Site Outline
Sharyl Lynn Riley
March 1, 2021

For this first step in completing your Final Project, you'll need to:

1. **Select a topic for your Final Project Website.**
2. **Create a sitemap or outline of your Final Project Website.**

These can both be contained in a single document/file for submission.

You will not develop web pages at this point, but you should begin working on development and you'll be asked for an update on your progress in Module 05.

Final Project Website Topic Selection

The topic of your website must be approved by your instructor. Provide the following information:

1. The topic of the Website.

The Topic is ME – a personal website

2. What is the purpose of the Website?

The purpose of the website is to brand myself as I showcase my skills and seek employment as an intern and then a permanent position after I graduate from Purdue.

3. List the reason you are creating the Website.

I am creating the website to showcase my skills (creating the website) and to have all of my information in one place such as my resume, projects, code samples.

4. List some specific goals you have for the Website.

Some specific goals that I have for the website are an organization scheme that is a more whimsical branding and a unique way of sharing information to ensure that the site is memorable to visitors. Another goal that I have is to promote myself and my skills by creating a website that doubles as a demonstration of my coding skills.

5. Who is your target audience?

My target audience is mainly employers that are seeking students for internships and recruiters that are looking for Cyber Security Warriors.

6. What type of content might be included in your Website?

The type of content that might be included would be an About Me, Resume, Portfolio, and Contact Information.

7. Describe the type of text, graphics, and media you will need for the Website. While you should write the text content yourself, you may use outside sources for royalty-free images and multimedia. Review copyright considerations (see Chapter 1).

To be honest, I am not sure what kind of text, graphics and media I will be using. I have been researching other websites and I have a couple that I like but I wanted to do some more research to find what is most pleasing to hiring managers and recruiters.

Note: When possible, you are encouraged to work on a "real-world" project for a business, non-profit, or organization.
